ARCOROC

SELECTION

PROFESSIONAL EDUCATION SOLUTIONS

Arcoroc™: THE solution for school and university catering

NURSERY AND PRIMARY SCHOOLS

SHOCK RESISTANT PRODUCTS

Ensure the safety of all children and staff at the canteens.
Designed for fast paced service.

LIGHTWEIGHT PRODUCTS

Reduce the canteen staff's risk of musculoskeletal disorders.
Facilitate transport of trays for the children.

MULTI-USE PRODUCTS

One product with a vast range of usages to optimize storage.

HEALTHY, DURABLE AND REUSABLE PRODUCTS

Choose safe glass products that are non porous, durable and reusable to give back to the environment.

HIGH SCHOOLS

COLLEGES

ERGONOMIC PRODUCTS

Facilitate the handling process throughout the service by both the canteen staff and children.

PRODUCTS WITH IDEAL CAPACITIES AND DIMENSIONS

Allow optimisation of space on the trays. Reducing food waste.

STACKABLE PRODUCTS

Optimize space during transport and storage.

AESTHETIC PRODUCTS

Make meal times fun and enjoyable.

ARCOROC

UNIVERSITIES

HIGH RESISTANCE OPAL GLASS

In 1958, the Arc research and development department developed and perfected since then a new material generation for dinnerware: Opal glass.
Food service professionals all over the world have opted for that all-round **professional material** solution that is **economical, ecological and practical.**

Up to **3 times more shock-resistant** than porcelain: the secret of its unbeatable durability.

Opal Glass products are **resistant to variations in temperature of 130°C**: they can thus be removed from the oven (or from a salamander) and placed directly in cold water without the risk of breakage.

Fade-resistant surface and pattern, even after 2,000 industrial dishwashing cycles.

As **efficient in keeping food hot** as other materials such as porcelain.
(at the same thickness and weight)

Can be **safely handled after microwave** use.

100% Opal, **0% porosity. 100% protection against bacterias.**

ZENIX
FINE QUALITY
HIGH RESISTANCE

HIGH SHOCK RESISTANCE | HIGH SCRATCH RESISTANCE | THERMAL SHOCK RESISTANT

Thanks to an innovative manufacturing process, Zenix™ combines the refinement of a nice cream color with advanced technology.
Zenix™ is also remarkable for the finishing above and below of its items.
Extremely resistant material, Zenix™ offers tableware a **long lasting quality**.

Zenix™ is up to 3 times more resistant to shocks and chipping than porcelain:
Savings in terms of budget and restocking costs.

Zenix™ has a perfectly smooth and non-porous reinforced surface.
Knives slide naturally across Zenix™ without leaving a trace*.
In normal washing and using condition, Zenix™ plates keep their beautiful aspect later for 2,000 industrial cycles.

*Preferably used with knives hardened beyond 500 Vickers/norm ISO 8442. Ceramic knives should not be used.

Zenix™ products are **resistant to variations in temperature of 130°C**: they can thus be removed from the oven (or from a salamander) and placed directly in cold water without the risk of breakage.

100% Zenix™, **0% porosity. 100% protection against bacterias.**

FULLY TEMPERED GLASS

EXTRA RESISTANT
FULLY TEMPERED GLASS

HIGH SHOCK RESISTANCE

THERMAL SHOCK RESISTANT

GLASS SAFETY **

For professionals, breakage problems are a regular occurence.
In order to increase the lifetime of product by 10 to 50 times, in 1958, our research and development center developed and perfected since then, a technical process known as «tempering».
This process provides products with excellent resistance to heat and mechanical shock.
Our items are fully tempered.

HIGH SHOCK RESISTANCE

Savings in terms of budget and restocking costs:
a tempered glass can be up to 5 times more resistant than an item that has not undergone any specific treatment process.

THERMAL SHOCK RESISTANT

Tempered products resist to temperature variations till 130°C:
they can thus be removed from the oven (or from a salamander) and placed directly in cold water without the risk of breakage.

GLASS SAFETY

Completely safe for table service*:
when a shock or series of shocks manage to rupture the exterior shell of the tempered glass, the resulting glass shards are not sharp to the touch*.
*According to the thickness. Cannot be applied to tempered Opal.

** NORVEGE LOG

HIGH RESISTANCE OVEN GLASS

Thanks to an innovative manufacturing process. Arcoroc™ oven glass **combines the aesthetics** of opaque ceramics with **the resistance of healthy glass** while staying **light weight.**
To meet professional requirements and intense daily use, Arcoroc™ ovenglass products are **highly resistant to impact** and **tempereature variations.**

Up to **3 times more resistant** than porcelain for a long durability.

Oven glass products are **resistant to variations in temperature of 180°C.**

250°C.

Fade-resistant surface even after 2000 industrial dishwashing cycles.

Non porous material. **No migration risk** particles into the food.

Hygienic and **healthy.**

30 % lighter than porcelain. **Ergonomical** and **practical.**
